## Rocк Bits 17-1/2" BM1HSXC

GLINIK DRILLING TOOLS

IADC Code: 117

## **FEATURES:**

Bearing Type.....journal, sealed

Cutting Structure.....very soft milled teeth

Leg Protection......shirttail hardfacing and tungsten carbide inserts

Connection.....pin 7-5/8 Reg

## **DRILLING APPLICATIONS**

Designed for drilling in very soft formations, unstratified, poorly compacted rocks such as shale clays, clays, poorly compacted clays and sandstones, marl limestones, salts, gypsum, hard coals, iron ores.

## **BENEFITS**

Exceptional drilling performance achieved by optimally selected cutting structure geometry in combination with effective flushing system.

Exceptional bit reliability thanks to top quality materials and optimized design of bearing system.

Guarantee of drilling long intervals while maintaining proper well geometry due to premium materials.
